

# HOW TO MAKE A BIRD APPLE FEEDER

Birds love grubs, tasty caterpillars and flies, but like us they also like fruit, nuts and seeds. Make a bird apple feeder and you'll give your garden birds like starlings, great tits, blue tits and thrushes a tasty treat.

Join us and create homes for wildlife in your garden

## YOU'LL NEED

## WHAT TO DO

1

Peel the apple using the peeler (but be very careful or ask an adult to help you)

3

Wrap the string around the apple, then cross it over underneath and tie it in a tight knot at the top

2

Poke the seeds into the apple so they stick out

4

Tie it to a tree branch, underneath a bird table, or somewhere where squirrels can't get to it! (Ask for help if it's high up!)
